TI - Container with a product inside

AB - The container comprises a wall which borders a closed chamber containing a substance which has a perfume. The perfume diffuses into the container surroundings through the chamber wall.

The chamber (2) is integrated in the wall (1) and the product (16) contains the same perfume (17) as the substance (3). The chamber wall (8) allows more rapid permeation than the wall (1). The chamber wall is preferably made of polypropylene or polyethylene. Use - The arrangement is used as a container for a cosmetic product.

Advantage - The user can tell what the product smells like from outside the container and is provided with the perfume smell from the container for a long time.
